

Munission Site

Everything Your Local Community Needs in One Civic Website

Make one civic website that meets all of your municipality's needs with Munission Site. Our designers will redesign and modernize your citizen portal from the ground up. They'll also equip your team with a streamlined management toolset that makes it easy to modify content and capture your local community's unique image. Give your citizens access to a cutting-edge online experience today.

A Custom Experience to Connect Your Community

Munission's world-class web designers partner with your team during every step of the redesign process. The end-result? A striking state-of-the-art website that emphasizes **ease of use** and **long-term viability**.

First, we construct a functional model that fits your needs. We then create a mock-up based on your aesthetic input and provided imagery to ensure that the final product **conveys your community's unique voice**. After mock-up approval, we incorporate components of the final design into templates that you can then use to **update your site at any time**.

Future-Proofed Features and Functionality

We pride ourselves on building websites that **stand the test of time**. By using best-of-breed development practices and integrating the newest web technologies into our proprietary content management system (CMS), we empower you to deliver an unprecedented online experience for your citizens.

Our CMS comes equipped with **endless customizations** and can completely integrate with Munission CEM, the world's first Citizen Experience Management platform. With this **variety of market-leading municipal tools** and plethora of options for creativity, your staff can easily employ the right mixture of features and functionalities to satisfy your citizens' needs.

Munission Site websites are also **scalable, mobile-friendly, and secure**. No matter how fast your community is growing, we can support your needs. You can also say goodbye to managing content in multiple places — our responsive designs allow citizens to view your website on any internet-connected device. Lastly, our rock-solid security has been hardened by years of "bug bounty" protection.

Content Management & Site Maintenance Made Easy

Munission Site's proprietary CMS is **intuitive to use** and gives you access to all the tools you need to modernize and future-proof the design and functionality of your public portal. After creating your page templates, our designers train and support your team so they can **easily edit, add, or remove content**.

Our templates don't only ensure that your aesthetic is consistent across your site; they also allow your team to modify content and **set up new pages in seconds**. All content can be reviewed before you publish it so you'll know exactly what it will look like on your site. You can also roll back to previous iterations with a few clicks.

Munission Site's CMS is so easy to use that **no web development skills are needed**. It also doesn't depend on any specialized software, so you can make updates from any computer. All of these advantages add up to an experience that accurately captures your community's unique image without requiring web expertise — **no need to spend money on costly content migration or page updates**.

Enhance Your Municipality's Online Experience With a Few Simple Clicks
