Re: 2020 Municipal Budget Message

Municipal Council and Mayor Allen:

Presented is the 2020 Municipal Budget for the Municipality of Bethel Park. This document includes balanced budgets for the General Fund, Sewage Fund, Capital Fund, Liquid Fuels Fund and the Fire Department Fund.

The General Fund, which is the largest of the funds, is balanced at \$28,576,340. The major revenues in this fund include Real Estate Tax and various Enabling Taxes, such as Earned Income, Local Services, and Deed Transfer tax. Real Estate Tax revenue should remain steady as the overall property assessment by Allegheny County has experienced minimal change. Earned Income continues to be one of the biggest sources of revenue in the Enabling Tax category for the Municipality due to the Act 32 collection system. Expenditures from the General Fund include nearly all of the Municipality's operating expenses, as well as an interfund transfer to the Capital Fund.

The Sewage Fund budget is balanced at \$16,126,737. The Sewage Fund is a financially independent fund, and incorporates all revenues and expenses associated with the operation of the Municipality's Sanitary Sewer Collection and Treatment System. Revenues are derived from Sanitary Sewer utilization fees which are assessed based on water utilization information provided by the Pennsylvania American Water Company. In addition to the expenditures necessary for the operation of the Municipality's Sanitary Sewer Treatment Plant, this fund includes all costs associated with the maintenance of the sanitary sewer infrastructure, debt service payments, and the Municipality's payments to the Allegheny County Sanitary Authority, (ALCOSAN). The budgeted revenues will support budgeted expenditures while generating an Unassigned Reserve of \$5,078,197 which represents 47.88% of total Sewer Fund expenditures.

The Capital Fund is balanced at \$7,092,331. This Fund finances the Municipality's capital improvement projects, such as the municipal road program, buildings /grounds and park improvements, public works and police vehicles, storm system improvements, and traffic signal upgrades. The 2020 Capital Budget also includes significant funding for infrastructure improvements to the Community Services, Municipal Buildings, and Parks and Recreation. The largest expense of the

Capital Budget for 2020 includes Flood Mitigation Projects at Oak Tree Park, Logan Road Ponds, and Birch Tree Park that was secured by a Pennvest Loan. The revenues are derived primarily from the General Fund, as well as interest earnings and occasional grant proceeds.

The Liquid Fuels Fund is balanced at \$976,326. This Fund exists as a condition of the receipt of the Liquid Fuels revenues from the Commonwealth of Pennsylvania. This revenue is transferred into the General Fund to cover expenses associated with street lighting and snow removal on state roads located within the Municipality.

Finally, the Fire Department Fund is balanced at \$1,430,084. The Home Rule Charter requires the allocation of .34 mills of Real Estate Tax revenue to support the operations of the Bethel Park Volunteer Fire Company and as a result those tax revenues will be directly deposited into this fund. The 2020 budgeted expenses include general operational expenses and building maintenance for the Clifton Road, Brightwood Road, and Milford Drive Fire stations as well as debt service payments for the Brightwood Fire Station. All expenditures from this Fund are approved by Municipal Council via the List of Bills at Council's Regular monthly meeting.

The 2020 Municipal Budget is available for public inspection in the Bethel Park Public Library and the Municipal's website at www.bethelpark.net/finance.

Respectfully submitted,

Laurence J. Christian Municipal Manager

INTRODUCTION

Capital programming is a systematic approach to planning capital projects in a manner commensurate with the community's ability to pay for the improvements. A well-organized Capital Improvements Program will avoid the unnecessary delay in the vital maintenance and/or replacement of equipment and facilities, ensure responsible fiscal planning, provide advance information to the public regarding anticipated capital projects, and assist staff in planning for application for Federal/State grant funds.

The 2020-2024 Capital Improvements Program has been developed in accordance with the following goals: (a) provide for adequate maintenance of currently owned equipment and facilities; (b) acquire necessary replacement and/or new equipment for the various Municipal Departments; and, (c) expand and/or enhance the desired facilities and services provided to the residents of Bethel Park.

The Capital Improvements Program is incorporated and adopted as part of the overall 2020 Municipal Budget. The majority of the Capital Improvements Program is funded through transfers from the Municipality's General Fund into the Municipality's Capital Fund. The exception to this is the Sanitary Sewer Corrective Action portion which is funded from sewer fees.

Contained herein is a list of the projects to consider for completion for the years 2020 through 2024, along with an estimated cost and brief description of each project.

PROJECT DESCRIPTIONS

GENERAL GOVERNMENT

PROJECT

Technology Infrastructure & Upgrades

GIS System

Municipal Code Book

DESCRIPTION

The technology infrastructure & upgrades budget includes annual costs for the replacement of some workstations and peripherals, major equipment warranties, and unanticipated emergency equipment purchases. In 2015 the Municipality replaced the server and as of 2021 that server is at end of life and is be replaced. The staff is also budgeting the replacement of new computers starting in late 2020 through 2024 based on the vendor's recommendation. Staff is also working on a website upgrade projected to take place in 2020 The cost of the website upgrade is projected to be \$30,000.

The Municipal Authority bond issue for sanitary sewer improvements includes funding for initial implementation of a Geographic Information System (GIS). The focus of that investment was purchasing necessary hardware and software, development of base maps and a sanitary system inventory, and implementing sanitary sewer applications. Additional Municipal funds are required on an annual basis to supplement the Authority bond funds in order to maintain and upgrade GIS applications for other Municipal functions such as permits, street maintenance and service requests. This fund is also used for the RoadBotics Program, which is utilized for Pavement Management. There is \$25,000 needed annually for upgrading the system with data and information updates

The Municipality contracts with a code publishing company for the update of the Municipal Code Book. Electronic files and paper updates are created. The annual cost of the annual upgrades of the code text is \$5,000. The annual license fee to include the code on the Municipal web page is \$2,000 per year. Building Inspection / Code Enforcement is required to purchase updated copies of the International Code every 3 years, which can take it up to \$10,000.

|---|---|---|---|---|---|---|
| | | | | | | |

DESCRIPTION

Vehicle Replacement

\$175,000 is requested for 2020. The police department intends to replace 3 current vehicles continuing the yearly practice. Additions funds are needed due to increased costs of equipping and to help cover any vehicles lost in an accident or unforeseen circumstance.

Police Bicycles

The Police Department will continue to update the bicycle patrol fleet. The funds will go into the purchasing and maintaining of bikes and equipment. The funds were originally for 2020 however, since the bikes are in good condition, we will be pushing it to 2021.

Portable Radios

In keeping with the programmed five-year replacement cycle for portable radios, the Police Department plans to replace 40 radios in 2020. The \$50,000 cost of the new radios will be partially offset by the trade or sale of old radios through the municipal bid program.

Mobile Data Terminals

The \$50,000 in funds are requested to install the Mobile Data Terminals (MDT) in marked police vehicles. Currently, police patrol units are not equipped with MDT's. Since the officers have been dependent on the dispatcher for information, installing the MDT's will allow an officer to perform their duties much more productively.

Short Barrel Rifles

Short barrel rifles are requested at the cost of \$12,000 for the four officers that are members of the SHACOG CIRT team. The short barrel allows the officer greater maneuverability when operating inside a building spaces. This then allows for a greater degree of safety for the operator. The SHACOG CIRT team has responded to some active shooter scenes in the recent past and this equipment will allow the officer to do their job more effectively.

PROJECT DESCRIPTIONS

PUBLIC BUILDINGS & PROPERTY

PROJECT

DESCRIPTION

MUNICIPAL BUILDING:

Funds are set aside each year in the event if a unit has to be replaced. Staff will continue to update Council if any significant changes should occur. \$30,000 is anticipated to be carried

over from 2019.

HVAC Chiller Replacement

The chiller was scheduled to be replaced in 2019, however after the equipment was examined, it is in very good condition so the

project is being pushed to 2021.

Municipal Building Renovations

Lower Level

Renovation of the downstairs office space (existing police department). Proposing lowering the existing ceiling replacing it with a drop down panels and replacing and or repositioning existing lighting estimated cost \$289,551. Replacement of the carpet on the right side offices, estimated cost \$7,200. Replace the police secretaries current desks to new work stations, and reconfigure existing space, Estimated cost for 2 work stations and file cabinets, also included 4 file cabinets for the communications area at a cost around \$10,000. Replacement of the Chief of Police office furniture to work station with locking desk, cost estimate \$3,500. Replacement of all existing door knobs on 26 doors to level style, we can no longer get parts for repair. Cost estimate \$13,000. Repainting office spaces on right side, cost for paint \$450. \$330,000 total is being requested in order to cover any changes that could occur during the actual construction for any of the projects.

COMMUNITY CENTER:

Furniture, Equipment & Site Improvement

Funding is planned each year to address equipment, furniture, and site improvement needs at the Community Center. With the constant flow of people in and out of the building on a daily basis, the furniture and equipment tends to get to the end of its useful life so \$10,000 is being requested to maintain all that is needed.

Security Upgrades

Security upgrades will include electronic key faub security at the Community Center in 2021. The Municipal building added this feature in 2018-2019 and it has helped add an ability to monitor all entry ways and those that would have access at specific times.

Recovering Panel Partitions

Since 1999 the operable panel partitions that divides off the multi-purpose rooms A, B, and C areas have had significant damage. Replacement of the material that is on the outside of the existing partitions is suggested with an estimated cost of \$35,000 for this project.

| Weight Limit Study | 15,000 | 15,000 | 15,000 | 15,000 | 15,000 |
| TOTAL | 4,784,834 | 3,010,000 | 2,850,000 | 2,950,000 | 2,850,000 |

Shaded areas are carryover items from the previous year

We are estimating the total cost to be \$21,000 of which we will have \$16,800 in revenue.

^{*}These projects are 100% funded by the Pennvest Loan

^{**} In 2019 we applied for a Penn Dot ARLE Grant, which is a 100% funded grant.

^{***} In 2019 we applied for a Green Light Go Program which requires 20% match.

^{****}Project has a 20% match so the \$76,000 Expense will be offset by \$60,800 in revenue with the net cost of the Municipality will be \$15,200.

PROJECT DESCRIPTIONS

COMMUNITY SERVICES & TRAFFIC SIGNALS

| <u>PROJECT</u> | | |
|----------------|-------------|-------|
| COMMUNITY | SERV | ICES: |

DESCRIPTION

General Road Program

The annual Road Program, as recommended by the Municipal Engineer and then approved by Municipal Council for \$1,650,000, includes repair and resurfacing. Increases are projected for inflation over time. This also includes ADA ramp installation on Municipal roads by PennDot as well as any Storm Sewer Maintenance and Underdrains that are part of the Road Program.

Public Works Vehicle Replacement

Replacement of two (2) 2012 International 8-Ton Salt/Dump Trucks at the cost of \$174,000 each. Replace two (2) 2011 Ford Pick-Ups at the cost of \$38,000 per truck. Replace 2008 Ford Stake Body trucks with 2 One ton Dump Trucks at the cost of \$75,000 each. Replace two (2) walk behind mowers/Z Mowers at \$22,000 per mower. \$618,000 is being requested to fulfill these vehicles.

MS4 Projects and Non-Construction These funds of \$225,000 are associated with compliance with the Municipal Separate Storm Sewer System permit and consist of completing projects associated with pollutant reduction plans and total maximum daily loads, public education, outfall testing, maintenance of storm water management ponds, stream bank protection projects, and heavy cleaning of infrastructure.

Storm Sewer Maintenance

The deterioration of the existing catch basins greater than four feet deep has increased due to the age of these structures. Over the past three years, funds have been used to reconstruct deteriorated catch basins and to add necessary drainage to protect the newly paved roads. \$250,000 is being requested to maintain these storm sewers.

Logan Road Gabion Wall

Gabion walls will be repaired along Logan Road to help prevent erosion as well as adding extra structure support and flood prevention. The \$100,000 project was originally set up for 2019, but will likely move to 2020.

Community Sidewalks

The Municipality will be using \$25,000 of annual funds for repair, replacement, and constructing sidewalks in the community.

Phase 1 Flood Mitigation

Oak Tree Park - A proposed underground detention tank will intercept existing piped storm water flow. The volume of flow will be reduced by soil infiltration, and the rate of flow will be reduced via detention before being discharged back into the existing storm sewer system. Two proposed rain gardens will intercept surface runoff and reduce the flowrate before discharging the flow into the existing storm sewer system. Water quality will be improved by removing sediment from the storm water flow. Construction & Engineering Cost: \$496,273.

PROJECT DESCRIPTIONS

COMMUNITY SERVICES & TRAFFIC SIGNALS

PROJECT

DESCRIPTION

COMMUNITY SERVICES:

Phase 1 Flood Mitigation

Logan Road Ponds - The function of the existing Logan Road Ponds storm water detention facility will be improved to reduce downstream flooding and improve water quality by removing sediment from the storm water flow. The existing flow splitting structure will be reconstructed to distribute the flow proportionally between the two existing ponds. The volume of both ponds will be expanded to provide for additional detention time. The ponds will each be equipped with a forebay to improve water quality by removing sediment from the storm water discharge. Construction & Engineering Cost: \$233,348.

Birch Tree Park - A proposed underground detention tank will intercept existing piped storm water flow. The volume of flow will be reduced by soil infiltration, and the rate of flow will be reduced via detention before being discharged back into the existing storm sewer system. A proposed rain garden will intercept surface runoff and reduce the flowrate before discharging the flow into the existing storm sewer system. Water quality will be improved by removing sediment from the storm water flow. Construction & Engineering Cost: \$320,213.

Thunderwood Drive Storm Sewer

The Storm Sewer behind the homes on Thunderwood Drive is made of Corrugated Metal Pipe. During an inspection of the pipe, it was found that the metal in the invert was in the early stages of deterioration. As a preventative measure, the pipe will be rehabilitated on the bottom through the use of gunite. The project is estimated at \$265,000; however it could be split into two phases, if needed. Phase I would be \$195,000 and Phase II would be \$120,000. The cost is more if the project is complete in two phases due to inflation and two mobilization fees.

Community Development Block Grant – Miners Park

A grant to install ADA upgrades in both lower and upper Miners Park. This will allow ADA access to the fields and playground. When the playground equipment at the Park is upgraded the next time, ADA accessibility will already be complete. The other component to the application will be to install a rain garden and a sediment box on the storm sewer. The total construction cost is estimated at \$150,000 with \$45,000 being requested from grant funding. Grants vary with respect to timing and funding levels, and as such the completion and timing of this project is dependent upon the receipt of grants and the requirements of the same.

PROJECT DESCRIPTIONS

COMMUNITY SERVICES & TRAFFIC SIGNALS

PROJECT

DESCRIPTION

COMMUNITY SERVICES:

Allegheny Land Trust

The Municipality is dedicating \$100,000 to the Allegheny Land Trust to purchase a 40.5 acre Bethel Greenway Project located near the intersections of Route 88, Connor Road, and Valley Drive. The land provides the opportunity to develop a large green space that is within walking distance of several neighborhoods and features a network of future hiking and biking trails.

TRAFFIC SIGNAL/INTERSECTION:

Penn Dot ARLE Traffic Signal - Rt. 88 @ Brightwood Road*

The Municipality is applying for a grant for a traffic light upgrade at the intersection of Brightwood and Library Road. This project is being pushed into 2020. The \$375,000 project is a fully funded grant to be completed.

Green Light Go – Fort Couch Road and Oxford Drive

The Municipality is applying for a grant to upgrade markings and traffic lights at the intersection and approach to the intersection. As of now this project is being pushed into 2020. The project cost is \$21,000 of which \$16,800 is anticipated in revenue to help offset the overall cost.

Penn Dot ARLE Traffic Improvements – Oxford Drive

The Municipality is applying for a grant to upgrade markings and signage along Oxford Drive from Highland Road to Fort Couch Road. The total cost for this project will be \$76,000 with \$60,800 in offsetting revenue so the net cost to the Municipality will be \$15,200.

Weight Limit Study

The Engineering Department will complete weight limit traffic study on various roadways at the direction of the Police Department Traffic Division. Currently large trucks are attempting to navigate roadways that not built for this type of use. In order for the Police Department to enforce the restrictions, a Weight Limit Study must be completed by a Traffic Engineer. A typical traffic study costs approximately \$3,000.00-\$5,000.00. The Engineering Department would like to complete approximately 3-5 studies per year. Once the studies are completed, the Police can begin enforcing the limits, which can result in revenue that would come back to the Municipality helping to offset the cost.

Shaded areas are carryover items from the previous year

*The Millenium Park Improvement Grant was budgeted in 2019 for \$327,500, however the grant expenses had to be updated to \$711,250. The Municipality was awarded a grant amount of \$268,300.

The combination of the 2019 amount carried forward plus the grant amount (327,500+268,300 = \$595,800) should have a net expense of \$115, 450 to the Municipality.

PROJECT DESCRIPTION PARKS & RECREATION

PROJECT

Millennium Park Improvements

Park Avenue

Village Green Park

Oak Tree Park

Simmons Park

DESCRIPTION

Millennium Park Improvements - This project will include a new concession stand, and transition the multipurpose field into an additional baseball field with artificial turf, and complete walking trails throughout the area. Funding for this project will be provided by a LWCF grant in the amount of \$268,300, which will help offset the \$711,250 total cost estimate. Future projects include lighting the proposed field.

This project includes a large playground with poured in place surfacing, benches, and shade structures. It also includes the construction of a restroom/concession/mechanical building and complete utilities for a splash pad/pavilion, the splash pad and pavilion feature. Funding for this project will be sought via State and County grants. The maximum amount for this grant revenue is \$500,000, which will help offset the \$1,874,380 total cost estimate. The Municipality applied for the RACP Grant in 2019 and is still waiting to hear the results of the application.

Village Green Park had a new playground installed in 2017 and new fields in 2018. There are a few more phases of the project to be complete which includes a small maintenance shed to be built on the property and for the portion of fence that is missing to be added along the tree line (near the T). The estimated cost for this is \$30,000. A future project will include lighting the field so it can be utilized later in the evenings. The estimated cost for light project is \$300,000.

This project includes the installation of a new playground as well as an ADA accessible ramp/parking spot. There is limited parking in this area, so an evaluation will also be complete to see if any additional spaces can be added and if the basketball court should be removed for parking. Funding for this project will be sought via State and County grants. Grants vary with respect to eligibility requirements, timing and funding levels, and as such the completion and timing of this project is dependent upon the receipt of grants and the requirements of the same. The project is estimated to cost \$125,000.

This project includes improvements to field drainage, updated dugouts, and updated concession stand. In addition to field improvements, a trail network should be established throughout the park. The trail would need to be evaluated to see if ADA accessibility could be accomplished. Estimated cost is \$200,000; however a more detailed design would need to be complete to get a more accurate cost (cost would depend on trial length, location, material, tree removal, etc.). Funding for this project will be sought via State and County grants. Grants vary with respect to eligibility requirements, timing and funding levels, and as such the completion and timing of this project is dependent upon the receipt of grants and the requirements of the same.

PROJECT DESCRIPTION

PARKS & RECREATION

PROJECT

Miner's Memorial Park Improvements

DESCRIPTION

Miner's Memorial Park Improvements - These improvements include baseball field improvements, a new walkway, and rehabilitation of the existing concession/bathroom. The maximum amount for this grant revenue is \$250,000, which will help offset the \$305,000 total cost estimate. Funding for this project will be sought via State and County grants. Grants vary with respect to eligibility requirements, timing and funding levels, and as such the completion and timing of this project is dependent upon the receipt of grants and the requirements of the same. Future projects include the installation of a new bathroom at the lower field/playground area as well as ADA compliant playground equipment.

UPMC Field

The updates to UPMC Field include the rehabilitation of the dugouts, a new backstop and bleacher replacement. Funding for this project will be sought via State and County grants. Grants vary with respect to eligibility requirements, timing and funding levels, and as such the completion and timing of this project is dependent upon the receipt of grants and the requirements of the same. The project is estimated to cost \$50,000.

Molly Hill Park

This project includes improvements to make the park ADA accessible, new benches, a new pavilion and playground, new trail system and a landscape buffer between the park and the trolley. Funding for this project was applied for in 2019 as part of a Neighborhood Park Grant which includes the Mollyhill, Elm Tree and Pine Tree Park improvements. The Mollyhill Park project is expected to cost approximately \$180,000. A grant was submitted for \$250,000. The total cost of the three projects is \$326,000.

Birch Tree Park

This project includes the installation of a new playground. The swings are being reset as part of the Stormwater Management Project. *This project will not be able to be ADA accessible due to the location and existing topography. The estimate cost of the new playground is \$100,000.

Elm Tree Park

This project includes the rehabilitation of the Basketball Court, installation of two new benches and new playground equipment. Funding for this project was applied for in 2019 as part of a Neighborhood Park Grant which includes the Mollyhill, Elm Tree and Pine Tree Park improvements. The Elm Tree Park project is expected to cost approximately \$71,000. A grant was submitted for \$250,000. The total cost of the three projects is \$326,000. *This project will not be able to be ADA accessible due to the location and existing topography.

PROJECT DESCRIPTION

PARKS & RECREATION

PROJECT

DESCRIPTION

Pine Tree Park

This project includes the rehabilitation of the Basketball Court, installation of new benches, repairs to the pavilion, a new grill and new playground equipment. Funding for this project was applied for in 2019 as part of a Neighborhood Park Grant which includes the Mollyhill, Elm Tree and Pine Tree Park improvements. The Pine Tree Park project is expected to cost approximately \$75,000. A grant was submitted for \$250,000. The total cost of the three projects is \$326,000. *This project will not be able to be ADA accessible due to the location and existing topography.

Peter J. Page Park

This project includes the installation of trails through Peter J. Page Park. The trails would be designed for walking and running on an unpaved surface. The topography is steep and would need to be evaluated for ADA accessibility. Estimated cost is \$150,000; however a more detailed design would need to be complete to get a more accurate cost (cost would depend on trial length, location, material, tree removal, etc.)

Recreation Park and Field Improvements

This line is a combination of Neighborhood Parks, Sports Fields, Recreation, and Park Improvements. There will be storm water basins added to Oak Tree Park, UPMC Field, and lower Millennium Field. Along with that there will a new roof to the shelter at Village Green Park. \$45,000 is being requested to cover the cost of the improvements.

Security Cameras

Cameras are to be installed at Park Avenue and Millennium parks to help prevent trespassing or vandalism. These cameras are to focus on the entry points, fields, and any buildings. The estimated cost of the cameras is \$25,000.

Shade Tree

The Shade Tree Commission would like to apply for grants to be utilized for tree inventories, plantings, maintenance and removal of public trees. This will be used to match funding on grants applied for or to begin the inventory on their own.

SANITARY SEWER CORRECTIVE ACTION

PROJECT

DESCRIPTION

Piney Fork Watershed

This funding level reflects costs associated with routine maintenance and operation of the system, and reducing infiltration and inflow. Non-construction funds are used to monitor flows, televise lines, inspect manholes, dye testing, perform studies and develop designs in known problem areas. Construction funds are used to perform spot repairs, manhole rehabilitation and sewer relining or replacement. Additional monies was placed in 2019 for potential repairs to sewers from landslides.

McLaughlin Run Watershed, Saw Mill Run and Cap Sanitary Watersheds

This funding level primarily reflects routine activities enumerated in the operation and maintenance plan that was required for these watersheds under the EPA/ACHD Administrative Consent Order.

In 2019 the funding will be focused in McLaughlin Run and Saw Mill Run to complete projects for flow reduction measures that may be required by the DEP as part of the interim Consent Order. This funding level supports ongoing future design of any required improvements, and development of a second ACO (Phase II ACO). It is unknown what the second ACO will be mandate, but draft Acos show a requirement to model the Saw Run System.

PROJECT DESCRIPTIONS

FIRE DEPARTMENT

PROJECT DESCRIPTION

MILFORD STATION:

Exhaust Fan For Engine Bay

The exhaust fan is needed to replace in the station to prevent pollution of air from the trucks as they are going in and out of the building.

Heating System

The heating system is going to need repair and possible replacement in the next couple of years. The project is scheduled to take place in 2020.

Extend Bay For Future Pumper

With the purchase of a new pumper truck in the near future, the building would have to be modified in order to accommodate the size of the truck for parking. As of now the estimate of work is \$150,000,

CLIFTON STATION:

Lot Repair

The lot is going to be need of repair in the next couple of years. For now the project is scheduled to take place in 2020 with an estimate of \$20,000 of labor and repair.

Heating System

The heating system is going to need repair and possible replacement in the next couple years. The project is scheduled to take place in 2020.
